**International Business Machines Corporation - IBM**

International Business Machines Corporation, headquartered in Armonk, N.Y., is the world's largest information technology company. IBM has more than 329,000 employees worldwide and conducts business in more than 170 countries. IBM revenue for 2007 was $98 billion.

IBM employs about 130,000 people in the U.S., and close to 200,000 outside the U.S. About 60% of our revenues are generated outside the US.

IBM's solutions and services span all major industries, including financial services, healthcare, government, automotive, telecommunications and education, among others. It is the diversity and breadth of our portfolio - spanning hardware, software, consulting, infrastructure services, research, financing and technology - along with our global presence - that uniquely separate IBM from other companies in the IT industry.

IBM is all about innovation. IBM is best at creating and delivering differentiating value to our clients. We are a global business. Much more than marketing products and services around the world, this means establishing deep roots locally and leveraging our multinational presence for operational advantage.

**IBM Belgium & Luxembourg**

IBM, the world's largest technology company, has operated in Belgium (and Luxembourg) since 1936 and employs 2,500 people in Belgium and Luxembourg. IBM counts among its core activities the creation, development and production of state-of-the-art information technology. In addition, IBM offers companies a wide range of services and solutions aimed at the best possible integration of their information technology.

Further information about IBM products, services and technology in Belgium/Luxembourg is available at [ibm.com/be](http://ibm.com/be)
