Top quality car parks for the customers' benefit

For over 50 years, the **Interparking Group** has been consolidating its position as an acknowledged expert in the design, development and operation of off-street public car parks for the benefit of over 60 million customers a year.

The **Interparking Group** helps to take the pressure off urban spaces in approximately 330 towns in which it is present today. Adding up all of the car parks at airports, hospitals and shopping centers that **Interparking** operates on the outskirts of those cities, this makes more than 531 car parks totaling some 261.000 parking spaces (84.500 on-street parking spaces) in Austria, Belgium, France, Germany, Italy, Spain and the Netherlands that generate a turnover of over 290 million euros. This puts **Interparking** among the top three in the European market in this sector.

From Belgium to Europe

Spread across 7 countries, the **Interparking Group** is the only company within its industry able to claim a genuine European presence. As the undisputed leader in Belgium, the **Interparking Group** is constantly looking to expand internationally.

Today more than 65% of **Interparking's** turnover comes from other countries. Through its subsidiaries of the Contipark Group, **Interparking** is now number one on the German market. By managing railway station car parks through its joint venture with Deutsche Bahn (the German railway), the Group has proved its potential as a key player in mobility infrastructure. The Contipark Group is also a reputed name in Austria, where it is present in towns such as Salzburg, Vienna and Linz. In Spain, the **Interparking Group** has carved out an excellent place for itself thus ensuring a significant presence in cities such as Madrid, Barcelona and Bilbao.

The **Interparking Group** also operates under its own name in France (formerly Uniparc and Codeparc) and the Netherlands.

In Italy, the **Interparking Group** has been managing car parks in Venice and Rome since the end of the 1990s and has been managing and controlling over 73,000 on-street parking spaces in 115 towns in Tuscany, Sicily, Umbria and Pullia.

The **Interparking Group** stands out from its competitors due to its **full mastery of the three key elements of the car park profession** in Europe: construction and financing, urban integration and management of a secure car park network at European level.

Finally, **Interparking manages, 24/7, a truly European network of wholly owned secure car parks** in seven countries. Its presence at European level fosters a constant interchange of experiences between the **Interparking Group** and its 1,800 staff on matters such as the design, construction and management of car parks, to the benefit of its 60 million customers.

The **Interparking** network is constantly looking to provide maximum satisfaction to its visitors, by reducing the stress of looking for a parking space and by providing easy access to well-lit, clean, and secure parking areas with a constant human presence and state-of-the-art security systems combined with highly affordable prices and pricing packages.

520 car parks that help more than 300 cities in Europe to breathe.

The space to be!

For more than 50 years, our vision of urban spaces has already helped more than 300 European cities to breathe.

Since 1958, the Interparking Group has constantly innovated and consolidated its position as a recognised expert in the design, development and operating of public and private car parks, including both on-street and off-street parking, thereby playing a key role in urban mobility.

The Interparking Group operates in 7 countries in Europe and provides environmental friendly parking facilities that satisfy the strictest quality criteria.

From building to financing car parks, including the urban integration and the day-to-day management of a secure network of car parks at European level, the Interparking Group is developing high quality customer friendly car parks.
